USING A MOSS RAKER
HELPS YOUR GRASS TO GROW

If you have a lot of problems with moss, it is a good idea to go the extra length and dethatch.

For best results, dethatch during the spring every year. A Moss Raker digs down into the lawn and yanks up most of the plant material growing in the upper thatch layer of your lawn rather than in the soil. Since this is where moss grows, disturbing the thatch can help prevent moss from settling in.

ABOUT US...

Bann Hire & Sales was established in 2007 with our depot in Banbridge. Two years later the depot in Portadown was opened.

Bann Hire & Sales originally was a tool hire business but now has an extensive range of plant including telehandlers, large excavators, dumpers and powered access equipment. In 2013 Bann Hire & Sales opened a depot in Lisburn. The Banbridge depot moved to a larger site in 2015 to cope with an increase in demand.

At Bann Hire & Sales, our focus is the provision of top quality plant and equipment, delivered to site on time with a first class back up service.
